## **U.S. BANK VOYAGER FLEET COMMANDER ONLINE ADDS NEW ENHANCED FEATURES**

**HOUSTON** (Jan. 27, 2009) – U.S. Bank Voyager Fleet Systems, a leading provider of universal fleet fueling and maintenance cards, has added several new product enhancements to its Voyager Fleet Commander Online account management software, giving fleet administrators more flexibility, greater insight and more control.

Voyager Fleet Commander Online is a secure, Internet-based account management software that gives fleet managers total access to observe, update, track and manage fleet card accounts and operations. With the enhancements, fleet administrators can more efficiently manage fleet card data by changing user settings, which can filter information on a user-by-user basis. Additional graphing options have been added, allowing fleet administrators to easily view and compare information at a glance, such as the transactions and dollar spent among the various oil companies.

Enhanced reporting will now display product-level spend in both fuel and non-fuel categories with the option to exhibit total units, total dollars and the average price per unit. With this enhanced level of data, a user can retrieve the total dollar spend by product for their entire organization.

Fleet Administrators now have the option to setup a user with a combination of viewing and/or editing for fleet cards, drivers and vehicles. This more refined permission structure gives users greater flexibility with how they view the system and gives fleet administrators the option to approach user setups in a new way, which allows for greater controls and flexibility.

"When we introduced the latest Fleet Commander Online enhancements at our recent client event, attendees were extremely excited about the opportunity to utilize new online fleet card management tools and data tracking reports. These tools will provide our clients with greater spending and expense management," said Mike Oleniczak, Vice President, U.S. Bank Voyager Fleet Systems.

U.S. Bank Voyager Fleet Systems Inc. is a leading provider of the universal fleet fueling and maintenance card for over 1.6 million vehicles. Specifically designed to serve the needs of any size fleet, Voyager issues the Voyager Fleet Card, accepted at over 230,000 retail locations in all 50 states and provides comprehensive fleet management information services to commercial businesses and government agencies.
