

# ▶ Vehicle/Equipment Leasing & Financing Services

Finish Line Fuels offers a complete bundle of vehicle/equipment leasing, financing, tracking and maintenance programs, available from Leaseure Corp., a leading commercial leasing facilitator. Finish Line Fuels' fleet clients now have access to a nationwide network of services to fit all of their vehicle and equipment leasing needs.

## **Vehicle/Equipment Leasing/Financing Plans**

Leaseure has been specializing in leasing solutions as a commercial facilitator for more than a decade and is a leader in working with companies to match vehicles and equipment, up-fitting needs, timing, costs and financing options to their specific requirements. With multiple funding sources available, clients can get a customized commercial lease which meets their needs.

## **GPS Products**

GPS products provide a rich suite of tracking capabilities and capture and report data from a vehicles onboard computer system. This helps fleet managers reduce costs; increase driver performance and safety and increase revenues with route optimization.

## **Automotive Maintenance Protection**

Our maintenance and repair management program addresses all aspects of vehicle repairs, including preventive and corrective maintenance. The program is designed to provide total vehicle maintenance administration and cost control through a combination of purchasing programs and pre-approved repair networks.

## **Extended Warranties**

Finish Line Fuels can now offer up to 100,000 mile extended warranties on regular commercial vehicles (up to, and including one-ton trucks). Our extended warranty prices are typically lower than what an auto dealership would charge.

Finish Line Fuels is the single source for all fleet management needs.
